This group project was designed to provide and save information about activities and restaurants into their personal account when people take a vacation. Technologies used: HTML, CSS, JavaScript, jQuery, Heroku, Firebase, AuthO, postgresSQL, Git/GitHub, Materialize

SELECT EXPERIENCE

Restaurant chain - With more than 10 years of management within the food industry, I was responsible for operations management with focus on customer service and the expansion of the franchise, which was successfully achieved. Interviewing, hiring, training, coaching, developing, ordering, scheduling, were some of my duties
